Ø Stromkosten	26.95 [€/kWh]
Benzinkosten	1.5 5 2€1.-653
Energieverbrauch	15[k235W1h/100k51m]
Benzinverbrauch	5.-5[21l/10035k123m6]

Startseite Statistiken System Hilfe & FAQ Einstellungen

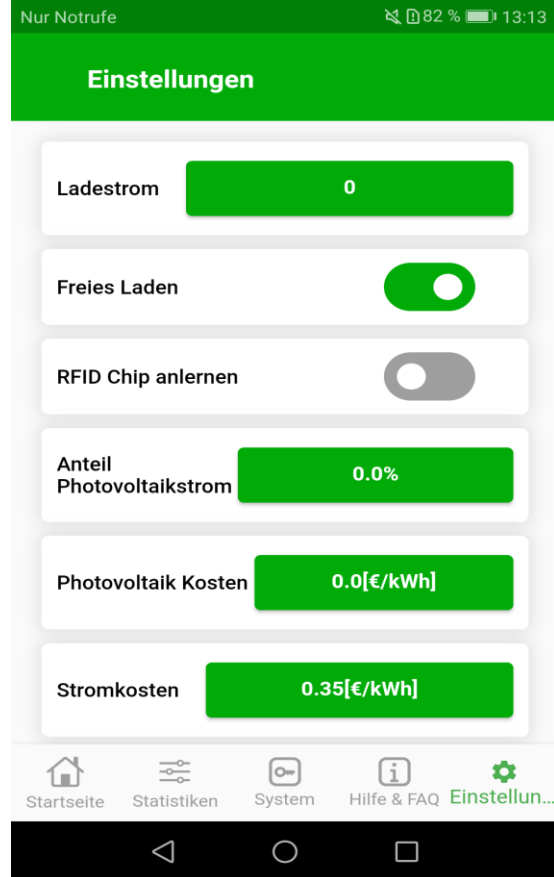

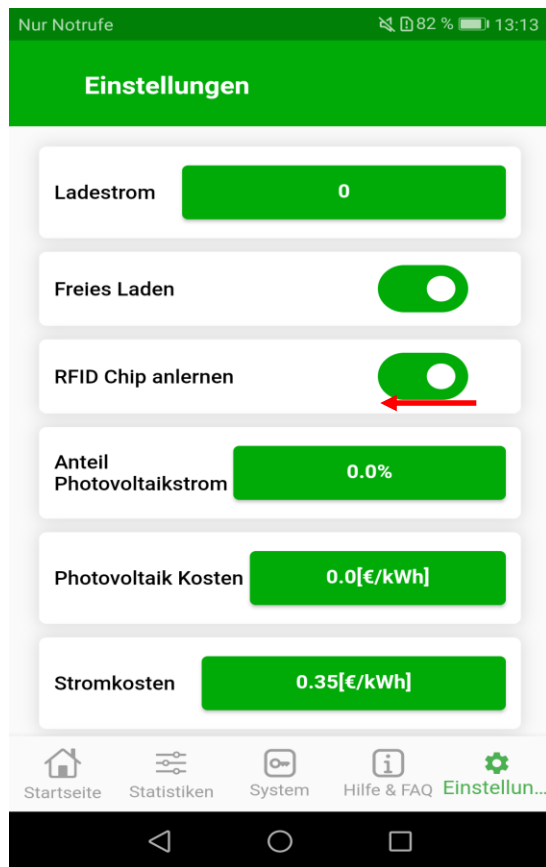

"Ladedauer" is displayed in seconds

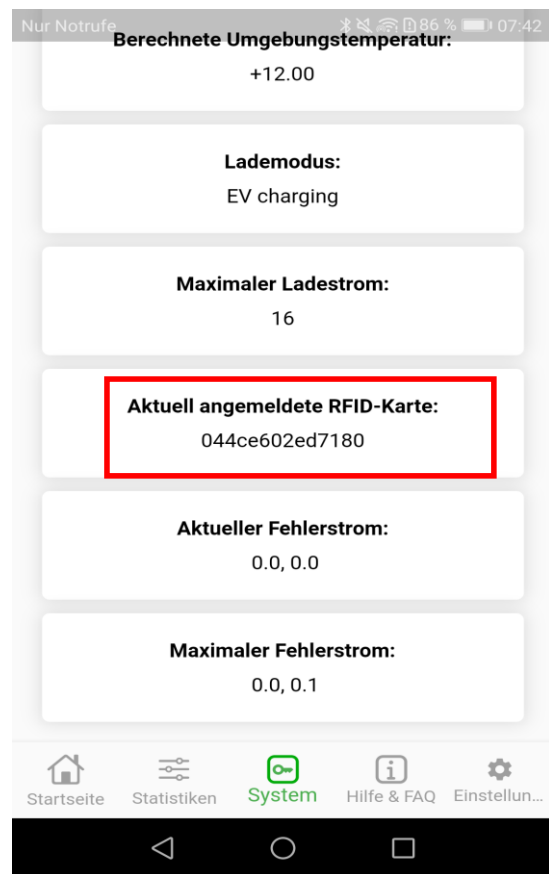

Calculations seems not to work. It shows only zero

switch off the RFID-learning mode ("RFID Chip anlernen") does not work.

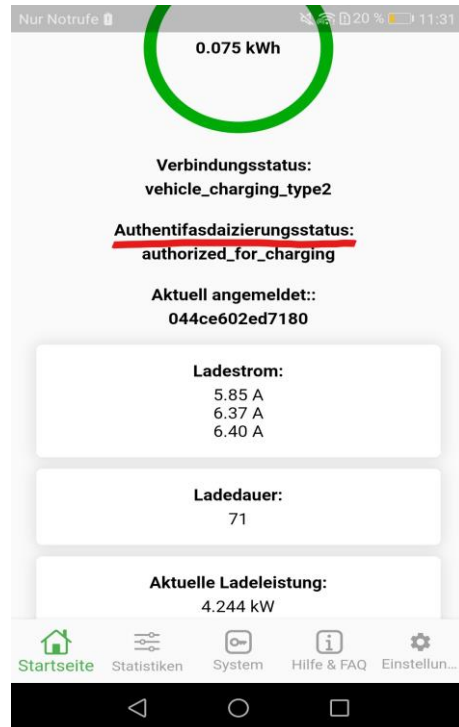

Name the RFID Chip does not work. After typing in a Name and pressing "OK" the app shows not the name.

Limit the result to two digits.

Should be "Authentifizierungsstatus"

Authentifizierungsstatus

Result / Improve
<p>Result of this calculation should be shown here immediatley when a value ("Anteil Photovoltaikstrom", "Photovoltaik Kosten" and "Stromkosten") is changed.</p>
<p>Same for all other variables</p>

The "Ladedauer" should be displayed in hours, minutes and seconds like:

hh:mm:ss

for this example 266 should be displayed like

00:04:26

No calculations are shown. I Charged a car up to 2 kWh but no values occur on the "statistiken" screen

Switch off the RFID-learning mode button will not switch off the learning mode.

will the following command be send if the button turns off?
switch off local whitelist learning mode:

```
curl -X POST -H "content-type: application/x-www-form-urlencoded" --  
data  
"FLLFillMode_fll=0&SUBMITTYPE=0d" --user operator:yellow_zone  
http://xxx.xxx.xxx.xxx/operator/operator
```

--

Please limit the result of calculation to two digits.

Please correct the naming
